

ISO/IEC 27001 Practitioner

APMG Accredited Course

INFORMATION SECURITY TRAINING

KNOW HOW TO APPLY ISMS CONCEPTS TO ACHIEVE THE OBJECTIVES AND REQUIREMENTS OF ISO/IEC 27001

About this course

This two-days and a half, APMG ISO/IEC 27001 Practitioner course, prepares the participants to achieve a sufficient understanding of ISO/IEC 27001 and its application in a given situation. A successful Practitioner candidate should, with suitable direction be able to start applying the International Standard to enable the management of information security (depending on the real situations).

Who should participate?

This course is aimed at those who are:

- Internal managers and personnel working to implement, maintain and operate an ISMS within an organization
- External consultants supporting an organization's implementation, maintenance and operation of an ISMS.
- Internal auditors who are required to have an applied knowledge of the standard

Learning Objectives

At the end of the course the participant should be able to:

- Apply the principles of ISMS policy and its information security scope, objectives, and processes within an organizational context.
- Apply the principles of risk management including risk identification, analysis and evaluation and propose appropriate treatments and controls to reduce information security risk, support business objectives and improve information security.
- Analyze and evaluate deployed risk treatments and controls to assess their effectiveness and opportunities for continual improvement.
- Analyze and evaluate the effectiveness of the ISMS through the use of internal audit and management review to continually improve the suitability, adequacy and effectiveness of the ISMS.
- Understand, create, apply and evaluate the suitability, adequacy and effectiveness of documented information and records required by ISO/IEC 27001.
- Identify and apply appropriate corrective actions to maintain ISMS conformity with ISO/IEC 27001.

Master ISO/IEC 27001 and its application in a given situation

- Understand how to apply the ISMS concepts to achieve the objectives and requirements of ISO/IEC 27001
- Understand the planning and operation of an ISMS, including the risk management process
- Understand how to apply the main controls and how these controls support the organization in fulfilling the ISO/IEC 27001 requirements
- Certify your skills and be worldwide recognized with an official APMG ISO/IEC 27001 Practitioner certification

About ISO 27001

ISO/IEC 27001 is an international standard that provides a framework for establishing an Information Security Management System (ISMS). The standard is designed to help organizations of all sizes and types to select suitable and proportionate security controls for information held electronically, on paper or other media. It provides a structured approach to help organizations work through their business processes, identify their information security weaknesses and create a tailored ISMS that takes account of their business risks.
